SUMMARY

Highly driven and motivated professional transitioning from the medical field to a career in coding. With a self-taught background and completion of Codecademy's Full-Stack Engineer certification, I bring a strong foundation in both front-end and back-end development. Passionate about leveraging my problem-solving skills and attention to detail to contribute effectively in a dynamic tech environment. Seeking opportunities to apply my coding skills and technical knowledge to deliver impactful solutions and grow as a developer.

EXPERIENCE

Orthopedic Technician
Huntington Orthopedics   2011- 2023, Pasadena, CA

· Trained new staff members on orthopedic procedures and protocols to ensure consistent and high-quality patient care.
· Leveraged extensive experience with Electronic Health Records (EHR) systems to enhance operational efficiency.
· Conducted training sessions for staff on EHR usage and provided critical feedback to EHR providers for system improvements.
· Developed a custom workers' compensation form generator, significantly streamlining the authorization process.
· Fostered a collaborative environment by liaising between medical staff, patients, and administrative personnel.
